1. 14th Marine Regiment received an analysis of Consumer Level Supply Management and Field Level Ground Equipment Maintenance from Field Supply Analysis - West (FSMAO-W) 03 - 14 June 2019. FSMAO inventoried 100 percent of all Marine Corps Readiness Reportable Ground Equipment (MCRRGE), Crane reportable assets, International Standards Organization configuration containers, and individual Military Equipment (ME) valued at or above 100,000 dollars. Procedural compliance was assessed using statistical sampling of records and equipment. FSMAO provided training targeting deficiencies that were identified during the analysis. The analysis results by category are as follows:

<b>Property Accountability</b>	High Risk Finding
<b>Procurement</b>	Medium Risk Finding
<b>Maintenance Program and Resource Management</b>	Low Risk Finding
<b>Maintenance Information and Reporting</b>	Low Risk Finding
<b>Maintenance Production</b>	Low Risk Finding
<b>Miscellaneous Accounting</b>	Low Risk Finding

2. Enclosure (1) provides a summary of findings that require a corrective action plan. Enclosures (2) through (9) contain amplifying details regarding each discrepancy. Enclosure (10) was briefed to the unit commander.

3. Point of contact for this report is (b)(6)
